

SF360 HO/CL

SF360 HO/CL has excellent stalk strength and very high yield potential. It's strong disease tolerance makes it well suited for all growing regions from North Central North Dakota through the High Plains to South Texas

Agronomic Traits

- Best suited for Central North Dakota, South Dakota and High Plains growing regions
- Excellent stalk and root strength
- Very High consistent yield potential
- Excellent Disease tolerance including DMR
- Herbicide trait: Clearfield®, beyond herbicide applications

Characteristics

Sunflower type	Oil
Maturity group	3
Days till 50% bloom	65
Days till R9	102
Average height	71 inches
Oil type	High Oleic
Average oil content	45%
Average HO content	86%
Average test weight	32

PEST RESISTANCE	9	7	5	3	1
Puccinia Helianthi Schwein	•				
Sclerotinia Sclerotiorum		•			
Phoma Helianthi Aleks	•				

Scale 1 to 9: 9=Highly Resistant 1=Highly Susceptible
